

GrowUp Finisher 16%

Premium 16% protein feed for rapid growth

Suitable for calves from 80kg liveweight.

NRM GrowUp Finisher is a balanced feed designed to bridge the energy/protein gap of growing stock beyond 80 - 100 kgs liveweight. Calves that have been weaned onto high protein spring pasture require less protein in a concentrated feed than younger stock.

Using GrowUp Finisher 16% together with pasture will result in increased weight gain.

Alternatively, use strategically to supplement the diet of growing stock to halt growth checks or to convert to extra liveweight gain.

Feeding Recommendation

Use with the Moozlee system to avoid growth check, or as the sole dry feed in any rearing system. Calves should be fed whole milk or Calf Milk Replacer (CMR) up to 5 - 6L per day until weaning. Wean off milk gradually at 80kg minimum weight, when consuming 1kg of GrowUp Finisher per day. When consuming 1.5kg of GrowUp Finisher, wean off milk completely. Continue to feed GrowUp Finisher at 1 - 1.5kg/calf per day for three - four weeks after weaning from milk.

Use GrowUp Finisher after Moozlee, GrowUp or Ready Rumen.

Always allow free access to fresh, clean water.

Feeding Rates

AGE	NRM POWER WHEY*	NRM GROWUP 16%	TARGET WEIGHT
Day 0 - 4	colostrum		40kg Body Weight min
Day 5 - 10	2L twice-a-day		
Day 11 - 21	2.5L twice-a-day		
Day 22 - wean	3L twice-a-day		28 days = 50kg
Day 50 - 66		ad-lib	66 days = 75kg
Day 67 - 84		ad-lib	84 days = 100kg

* 125 - 150g of NRM Power Whey with water to make up 1L

Storage

Please ensure product is stored in a cool, dry and vermin free environment.

Caution

Do not feed to any other animal species other than those stipulated on the label.

Key Benefits & Features

- Premium 16% protein feed for once-a-day and twice-a-day feeding systems.
- Balanced energy/protein to maximise growth during rumen development.
- Vitamin and mineral package for optimal health and development.
- Moozlee flavourants for consistent palatability.
- Bovatec® for coccidiosis protection.
- Recyclable packaging.
- PKE free.

Typical Analysis

(approximate on a DM basis)

Protein	16%
Moisture	12%

GrowUp Finisher 16%

Important

Bovatec® is registered pursuant to the AVCM Act 1997, No. A009679.

See www.nzfsa.govt.nz/acvm for Bovatec® registration conditions.

Ensure young animals are adopted to medicated feed two - three weeks prior to weaning, as coccidial challenge is most likely in the eight weeks after weaning. In any case initiate treatment at least two days prior to expected coccidial challenge.

Feeding Recommendation for Coccidiosis Control

For coccidiosis control, minimum dose rate of 5mg Bovatec®/kg liveweight (1mg lasalocid sodium/kg liveweight) is required per day. Up to twice this dose rate is indicated where severe coccidial challenge is expected or a wide range of individual liveweights occur within a group.

Feeding Rates for Coccidiosis Control

CALF WEIGHT (LIVEWEIGHT)	FEED PER DAY
40kg	0.4kg
50kg	0.5kg
60kg	0.6kg
70kg	0.6kg
80kg	0.7kg
90kg	0.8kg
100kg	0.9kg
107kg	1.0kg

Calf feed with Bovatec® 20CC, ACVM Registration Number A009679

BOVATEC® FOR ANIMAL TREATMENT ONLY
Contains lasalocid sodium at 108mg/kg of feed

Indications: Coccidiosis control in cattle, calves and goats.

Contraindications: Care must be exercised when feeding concurrently with other antimicrobials. Do not feed with other ionophores, e.g. monensin capsules, liquid or premix. Do not exceed recommended dose rates. Do not feed more than a total of 400mg lasalocid/head/day to lactating cattle. Not to be used for single-dose treatment. Do not allow dogs, horses (or other equids), alpacas (or other camelids) access to feeds containing Bovatec, as ingestion by these species may be fatal.

Withholding period: Meat: nil Milk: cattle - nil, goats - 35 days
