

Little Pig Tucker Pellets

A balanced feed for pigs with high nutrient requirements

For rapidly growing young pigs and high producing lactating sows.

NRM Little Pig Tucker Pellets are formulated with high quality ingredients to provide balanced protein and energy for lean growth in young pigs and milk production in lactating sows.

As NRM Little Pig Pellets are a complete feed, the provision of other supplements should be limited as this may reduce growth rates.

Ingredients selected from

Grain and grain by-products, plant proteins, vegetable oils, enzymes, amino acids, limestone, mono or di-calcium phosphate, salt, mould inhibitor, vitamins and trace minerals, animal fats and organic acids.

Feeding Recommendation

Piglets	Creep feed with NRM Little Pig Tucker while providing sow milk or milk replacer until 7 – 8 weeks of age.
Growing Pigs	Ad-lib for maximum growth. Some feed restriction may be necessary at older ages for minimise fat deposition.
Lactating Sows	Feed from 5kg at farrowing building up to 8 – 9kg per sow per day depending on body weight, litter size and environmental temperature/conditions. For Lactating Sows: Feed 1 to 2kg plus 0.25kg per piglet per day while allowing access to pasture or other fibre.
Kunekune Pigs	For growing pigs up to 4 months of age: Feed up to 0.5kg per pig per day depending on required weight gain and pasture quality and availability.

Ensure access to fresh, clean water at all times.

Storage

Please ensure product is stored in a cool, dry and vermin free environment.

Caution: Do not feed to any animal species other than those stipulated on the label.

Typical analysis (approximate on an as fed basis)

Crude Protein 17%
