

# Ready Rumen® Pellets & Straw with Coccidiostat

An all-in-one feed, designed to provide pellets and straw in a single feed

Ready Rumen® is a blend of high protein mineralised pellets, lucerne chaff and molasses.

The long fibre in Ready Rumen® is included to aid rumen function and rumination activity. A complete feed that requires no added roughage, vitamins or minerals, Ready Rumen® offers a hassle free feed for all types of calf rearing systems.

## Feeding recommendation

Ready Rumen® is a complete feed suitable for ad lib feeding to calves housed inside from 4 to 70 days of age. An easy to use complete feed, Ready Rumen® is ideal for both 'once-a-day' and 'twice-a-day' systems. Ready Rumen® should be fed ad lib with fresh feed offered each day. Calves fed Ready Rumen® do not require access to pasture until 8-10 weeks of age at up to 1.5kg/head/day.

Ensure calves always have access to clean, fresh water. Ensure young animals have access to a feed containing a coccidiostat at least 2-3 weeks prior to weaning, as a coccidial challenge is most likely to occur in the first 8 weeks after weaning.

## Ingredients selected from

Grain and grain by-products, oilseed meals and by-products, molasses, roughage, minerals (including limestone, mono-dicalcium phosphate, salt), vegetable oils, organic acids, vitamins and trace minerals, flavour, Bovatec® 20CC.

## Storage

Please ensure product is stored in a cool, dry and vermin free environment.

**Caution: Do not feed to any animal species other than those stipulated on the label.**

## Typical analysis (approximate on a dry matter basis)

Energy	12.0 MJ ME/kg DM
Protein	19.5%
Moisture	12.5%

The Metabolisable Energy (ME) values are calculated by a registered laboratory from an equation and are not an actual measured value. Therefore they are only a guide for predicting the energy content of a feed.

## Ready Rumen® calf feed with Bovatec® 20CC

### FOR ANIMAL TREATMENT ONLY

**INDICATIONS:** Contains 108mg/kg of lasalocid sodium as 504g/tonne Bovatec® 20CC A9679 as an aid in the control of coccidiosis caused by Eimeria species in cattle. Feed 0.5kg of NRM Ready Rumen per 54kg calf to provide 1mg of lasalocid per kg of body weight.

PREMIUM FEED

ALL-IN-ONE

PKE FREE

**CONTRAINDICATIONS:** Care must be exercised when feeding concurrently with other antimicrobials. Do not feed with other ionophores, e.g. monensin capsules, liquid or pre-mix. Do not exceed the recommended dose rates.

**CAUTION:** Do not feed to bobby calves. Do not allow dogs, horses (or other equids), alpacas (or other camelids) access to feeds containing Bovatec®, as ingestion by these species may be fatal. This product must not be used for growth promotion in ruminants intended for human consumption.

### WITHOLDING PERIOD:

It is an offence for users of this product to cause residues exceeding the relevant MRL (Maximum Residue Limits of Agricultural Compounds) in the New Zealand Food Standard.

Meat: Nil  
Milk: Nil

Bovatec® 20CC is registered pursuant to the ACVM Act, 1997. ACVM Registration Number A009679. See [www.nzfsa.govt.nz/acvm](http://www.nzfsa.govt.nz/acvm) for registration conditions.

By law the user must take due care, obtaining expert advice if necessary to avoid unnecessary pain and distress when using the product other than as directed on the label.

**THE QUALITY OF NRM PRODUCTS IS GUARANTEED**
