

Mixed Grain

New Zealand grown grains and legumes formulated from non-GMO* ingredients

Whole wheat with steam flaked maize, barley and peas.

Feeding Recommendation

Contains whole wheat which is ideal for feeding to all classes of birds but particularly waterfowl.

Contains steam flaked maize, barley and peas to create more evenly sized particles than dry rolling which may improve intake and performance.

Processed to ensure good digestibility, utilisation and appeal.

Contains only NZ grown, non-GMO grains and legumes with a proven mould inhibitor to preserve freshness.

Mixed Grain is not a complete feed and should only be offered as a supplement to other feeds as part of a complete diet that is suitable for the type of bird being fed relative to its stage of production.

Grains are low in some essential major minerals, trace elements and vitamins so users should ensure the complete diet is balanced.

Always introduce new feeds gradually.

Discard any feed which becomes dusty or mouldy due to water damage during transport or storage.

Ensure that fresh, clean drinking water is always available.

NZ MADE

VERSATILE

NON-GMO

Typical Feeding Rates

POULTRY

Adult

Up to 50g per day

Ingredients selected from

Wheat, Maize, Barley, Peas, Preservative.

Typical analysis (approximate on an as fed basis)

Crude Protein	11%
Moisture	15%

Storage

Ensure product is stored in a cool, dry and vermin free environment.

Caution: Do not feed to any animal species other than those stipulated on the label.

* Formulated from non-genetically modified crops and by-products, may contain traces of GM materials used in the feed mill.
