

# Assett® Textured Feed

## Complete feed for young growing horses

Suitable for horses from 6 months of age.

NRM Assett is a well balanced, palatable, highly nutritious feed intended for weanlings and yearlings. It is designed to achieve optimum growth rates and top condition in young horses for ongoing peak performance. Containing steam flaked grains for increased digestibility and a full vitamin and mineral profile to ensure all nutrient needs are met.

### Key Benefits and Features

- Palatable blend of steam flaked grains and digestible fibre to support steady growth rates.
- Contains high quality protein to provide essential amino acids vital for sound growth and development.
- Fortified with all the vitamins and minerals required for young horses including natural vitamin E, which has superior bioavailability compared to synthetic sources.
- Highly palatable – ideal for fussy eaters.

### Typical analysis (approximate on an as fed basis)

Crude Protein	13%
Fat	5%
Fibre (NDF)	20%
Moisture	13%
Digestible Energy	12.5MJ/kg

NATURAL  
VITAMIN E

SKELETAL  
DEVELOPMENT

STEAM FLAKED  
GRAINS

### Nutrient Composition per 1kg of NRM Assett (on an as fed basis)

Crude Protein	130g	Selenium	0.6mg	Vit B3 (Niacin)	20mg
Lysine	5g	Manganese	85mg	Vit B5 (Pantothenic acid)	9mg
Methionine	2g	Iron	140mg	Vit B6 (Pyridoxine)	2.5mg
Calcium	8g	Iodine	1mg	Vit B7 (Biotin)	10mcg
Phosphorus	5g	Cobalt	0.3mg	Vit B9 (Folic acid)	2mg
Magnesium	2g	Vit A	9,000IU		
Sodium	4g	Vit E	120IU		
Potassium	10g	Vit D	1,000IU		
Chloride	8g	Vit K	3.5mg		
Zinc	100mg	Vit B1 (Thiamine)	5mg		
Copper	40mg	Vit B2 (Riboflavin)	8mg		

# Assett<sup>®</sup> Textured Feed

Complete feed for young growing horses

## Feeding rates

GROWTH STAGE	HORSE WEIGHT	FEEDING RATE (KG/D)
Weanlings 6 to 12 months of age	200-350kg	2-4kg
Yearlings 12 to 18 months of age	350-450kg	3-5kg

If NRM Assett<sup>®</sup> is not the best feeding solution for your horse, we recommend NRM Evolve or NRM Prepare as suitable alternatives. Horses less than 6 months of age should be fed NRM Prepare.

## Feeding Recommendation

NRM Assett<sup>®</sup> can be fed alone or combined with a suitable fibre source. The following recommendations are for horses with a mature body weight of 500kg. Adjust intake according to needs based on breed, body weight, body condition, growth rate and available forage. Always provide at least 1.5% of the horse's body weight in good quality forage (pasture, hay, chaff, fibre products) per day. Always allow free access to fresh, clean water.

## Ingredients

Steam flaked barley, steam flaked maize, steam flaked oats, grain co-products, vegetable protein meal, molasses, lucerne chaff, vegetable oil, KER vitamin and mineral pre-mix, amino acids, minerals and salts, mould inhibitor, apple flavour.

## Storage

Please ensure product is stored in a cool, dry and vermin free environment.

**Caution: Do not feed to any animal species other than those stipulated on the label.**

## NRM and Kentucky Equine Research

Kentucky Equine Research (KER) works closely with an international network of horse feed manufacturers dedicated to the advancement of equine nutrition and exercise physiology to produce healthier, more athletic horses. Using advice from KER, NRM feeds are formulated to incorporate the very latest advances in equine nutrition. The combination of NRM's long-standing role as a leader in the New Zealand feed industry and KER's technical expertise in the field of equine nutrition makes NRM feeds some of the most scientifically advanced available in the local market.

## NRM Stud and Breeding Horse Feed Range

A range of feeds providing essential ingredients for your horse's well-being.

Developed in partnership with Kentucky Equine Research (KER) and proudly manufactured in New Zealand, NRM feeds are unique blends of nutrients and quality products to optimise the health and performance of your horse.

There is an NRM feed to match the diverse needs of horses through every stage or activity level of their life. It is important to carefully monitor energy levels to ensure that under or over feeding does not occur.
