

Chook Tucker

Textured feed

A delicious textured feed for laying hens

A wholesome complete feed suitable for all laying hens. With the goodness of quality grain, kibbled maize and nutritionally rich pellets, NRM Chook Tucker is formulated to provide your hens with a balanced diet containing the protein, energy and calcium they need for good health and great eggs.

Contains natural pigments to support rich golden yolks, and a prebiotic and probiotic blend to aid in protecting against gut pathogens.

KEY BENEFITS AND FEATURES

A textured feed which birds love, NRM Chook Tucker contains:

- High protein, fully mineralised pellets balanced with high energy quality grains to meet the needs of laying hens.
- Prebiotics and probiotics derived from poultry origins to help outcompete harmful bacteria and support animal health and food safety.
- Plant pigments from paprika and marigold to enhance yolk colour when access to foraging green feeds may be limited.

SUPPORTS SHELL QUALITY

FOR GOLDEN YOLKS

GUT HEALTH

SUITABLE FOR POINT OF LAY AND LAYING BIRDS

NRM Chook Tucker should be fed to hens from point of lay until end of lay.

Textured feed

FEEDING RECOMMENDATIONS

Suitable for all breeds when in lay from about 16 weeks of age (point of lay). Feed to appetite – approximately 1 cup (or a good handful, or 125-130g) per hen per day.

Textured molassed form which chickens love but not suitable for some gravity fed feeders which are better suited to fully pelleted feeds such as NRM Peck 'n' Lay Pellets.

For best results, provide access to NRM Oyster Shell Grit to ensure good shell quality. Grit should be supplied separately, not sprinkled on top of feed.

Suitable for feeding to laying farmyard ducks.

Ensure hens have access to clean, fresh drinking water at all times.

TYPICAL ANALYSIS

Nutrient	As Fed Basis	Dry Matter Basis
Dry Matter %	85	100
Crude Protein %	15	17.5
Calcium %	3.8	4.4

Variations in nutritional values may occur due to natural variability in feed ingredients. Our FeedSafe NZ certified sites have well developed systems to minimise any variation from the typical levels shown.

INGREDIENTS SELECTED FROM

Grain and grain by-products, plant proteins, molasses, vegetable oils, enzymes, amino acids, limestone, oyster grit, mono or dicalcium phosphate, salt, sodium bicarbonate, vitamins and trace minerals, mould inhibitor, probiotics, prebiotics and natural pigments.

May contain or be sourced from genetically modified source crops.

STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight.

Do not feed if product has become wet and moulded.

DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL

From 2024 any bags with the Recycle Me logo are made from woven polypropylene that:

- Provide excellent protection against moisture and pests compared to paper alternatives
- Are strong and can be re-used for a multitude of purposes on-farm
- Use 25% less plastic than our previous bags which means less resources are used in their production and transport
- Are recyclable through Agrecovery
