

Crushed Barley

New Zealand Grown Barley

A high energy grain which is a readily digestible source of energy that has been processed by dry crushing.

KEY BENEFITS AND FEATURES

NRM Crushed Barley contains:

- NZ grown grain which has been processed to break the seed coat to ensure improved digestibility to cattle, camelids, pigs and horses.
- More fibre and less starch than wheat so can be better suited to those classes of stock at greater risk of acidosis such as horses or where higher rates of feeding are necessary to grazing animals.
- A concentrated source of fermentable energy so a good complement to forages when the quality or quantity available does not support the needs of the class of animal being fed.
- Less protein than some by-product feeds so will not contribute as much to an over-supply of protein to grazing animals on leafy pasture.

HIGH ENERGY

NZ MADE

VERSATILE

FEEDING RECOMMENDATIONS

Barley is a high energy feed rich in starch. NRM Crushed Barley is not a complete feed and should only be offered as a supplement to other feeds as part of a complete diet suitable for the type of animal being fed.

For pigs and poultry ensure adequate protein is available as part of the diet.

For horses, camelids and ruminants (cattle, sheep, goats and deer) ensure adequate pasture, silage or hay is always available.

Always introduce new feeds gradually over 10-14 days. Processed feed barley is readily fermentable - rumen buffers should be considered if feeding to ruminants at high rates in discrete meals.

Ensure clean fresh drinking water is always available.

FEEDING RATES (KG/HEAD/DAY)

Animal Species	Animal Type	Feeding Rate (kg/head/day)
Cattle	Dairy cows	Up to 6kg
	Beef animals and dry cows	Up to 2kg
	Calves	Up to 1kg
Sheep	Ewes	Up to 200g
	Lambs	Up to 100g
Goats	Does	Up to 300g
	Kids	Up to 150g
Horses		Up to 2kg
Camelids	Adult	Up to 300g
Deer	Adult	Up to 1kg
Poultry		Up to 50g
Pigs		Up to 500g

New Zealand Grown Barley

TYPICAL ANALYSIS

Dry Matter%	87
Crude Protein%	10
Digestible Energy MJ ME /kg DM	12.8
Metabolisable Energy* MJ ME /kg DM	13

* The metabolisable energy (ME) values are calculated from an equation and are not an actual measured value. Therefore, they are only a guide for predicting the energy content of a feed.

Variations in nutritional values may occur due to natural variability in feed ingredients.

INGREDIENTS

Barley. NZ barley is not genetically modified.

Does not contain any Restricted Animal Material.

STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight.

RECYCLE ME

NRM bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. NRM bags are made from woven polypropylene.
