

# Feed Wheat

## New Zealand Grown Wheat

A high energy grain, which may be fed whole to poultry, sheep and goats but requires processing prior to feeding cattle, camelids, pigs and horses.

### KEY BENEFITS AND FEATURES

NRM Feed Wheat contains:

- A concentrated source of digestible energy coming predominantly from starch which can support production and condition across all farmed animal species.
- A very low fibre level so is easily digested by pigs and poultry, and less filling for grazing animals and will support higher production levels including weight gain and milk production.
- Less protein than some by-product feeds, so will not contribute as much to an over-supply of protein to grazing animals on leafy pasture.
- Whole grains which can have benefits for some classes of poultry and sheep.

Product available in 10kg or 20kg.

### FEEDING RECOMMENDATIONS

NRM Feed Wheat is not a complete feed and should only be offered as a supplement to other feeds as part of a complete diet suitable for the type of animal being fed.

For pigs and poultry ensure adequate protein is available as part of the diet.

For horses and ruminants (cattle, sheep, goats, deer and camelids) ensure adequate pasture, silage or hay is always available.

Always introduce new feeds gradually (over 7-14 days). Processed feed wheat is readily fermentable - rumen buffers should be considered if feeding to ruminants.

Ensure clean fresh drinking water is always available.

### FEEDING RATES (KG/HEAD/DAY)

Animal Species	Animal Type	Feeding Rate in kg/head/day
Cattle	Dairy cows	Up to 6kg
	Beef animals and dry cows	Up to 2kg
	Calves	Up to 0.75kg
Sheep	Ewes	Up to 100g
	Lambs	Up to 75g
Goats	Does	Up to 150g
	Kids	Up to 75g
Camelids	Adult	Up to 300g
Deer	Adult	Up to 1kg
Poultry		Up to 50g
Pigs		Up to 500g

### TYPICAL ANALYSIS APPROXIMATE ON AN 'AS FED' BASIS\*

Dry Matter%	87
Crude Protein%	11

\*As a single source of natural feed, the nutritional value of grain will vary. Variations in nutritional values may occur due to natural variability in feed ingredients.

# Feed Wheat

## New Zealand Grown Wheat

### INGREDIENTS

New Zealand grown wheat is not genetically modified.  
Product does not contain any Restricted Animal Material.

### STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight.

### RECYCLE ME

NRM bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. NRM bags are made from woven polypropylene.
