

Progress

Nuts

A concentrated high-quality breeding cube that meets the increased nutritional demands of the broodmare and young growing horse in a low daily intake.

NRM Progress is a concentrated high-quality breeding nut designed to meet the increased nutritional demands of broodmares and growing horses. Provides the essential nutrients required for the critical last stage of gestation and supplies nutrition with minimal calories to young stock grazing high calorie pasture. Contains Buffered Mineral Complex (BMC), Vitamin C and organic trace minerals from Kentucky Equine Research. Research shows BMC serves as a potent buffer in both the stomach and large intestine as well as increases bone density in young working horses and weanlings.

KEY BENEFITS AND FEATURES

- Concentrated formulation ideal for young horses at risk of Developmental Orthopaedic Disease
- Supports gastric and hindgut health and improves bone mineral density
- Recommended for performance horses, especially those at risk of shin soreness, gastric ulcers, or Big Head disease from high-oxalate grazing

TYPICAL ANALYSIS (APPROXIMATE ON AN AS FED BASIS)

Crude Protein	12.5%	
Fat	3%	
Fibre (NDF)	6.5%

STEADY GROWTH

Progress is ideal for:

NUTRIENT COMPOSITION PER 1KG OF NRM PROGRESS

Crude Protein	125g
Calcium	20g
Sodium	6g
Sulphur	1.5g
Selenium	1.5mg
lodine	3mg
Vit A	27,000IU
Vit K	14mg
Vit B3 (Niacin)	85mg
Vit B7 (Biotin)	0.3mg
Vit C^	850mg/kg

Lysine	5g
Phosphorus	8g
Chloride	10g
Copper [^]	110mg
Manganese [^]	250mg
Cobalt	0.7mg
Vit D	2,700IU
Vit B1 (Thiamine)	16mg
Vit B5 (Pantothenic acid)	34mg
Vit B9 (Folic acid)	8mg

Methionine	2g
Magnesium	5g
Potassium	10g
Zinc^	300mg
Iron	300mg
Chromium	2.5mg
Vit E^	390mg
Vit B2 (Riboflavin)	28mg
Vit B6 (Pyridoxine)	8mg
Vit B12	90ug/kg

 $^{^{\}wedge}\text{Contains}$ Zinpro organic minerals and natural vitamin C and E.

FEEDING RECOMMENDATIONS

NRM Progress can be fed alone or combined with a suitable fibre source. Adjust intake according to needs based on breed, body weight, body condition, workload and available forage. If NRM Progress is not the best feeding solution for your horse, we recommend NRM Evolve® as an appropriate alternative. Always provide at least 1.5% of the horse's body weight in good quality forage (pasture, hay, chaff, fibre products) per day. Always allow free access to fresh, clean water.

Growth stage	Weight of horse	Daily Feed rate
Weanlings 5 to 12 months of age	200 – 350kg	1.0kg
Yearlings 12 to 18 months of age	350 – 450kg	1.2kg
Spelling two-year-olds and older	350 – 450kg	1.2kg
Mid to late pregnant mares	500kg	1.2kg
Lactating mares first 60 days	500kg	1.4kg
Lactating mares - late	500kg	1.2kg

INGREDIENTS

Grain and grain co-products, vegetable protein sources, cold pressed canola oil, molasses, minerals and salts, KER vitamin and mineral premix including Zinpro organic trace minerals, KER Buffered Mineral Complex, mould inhibitor, apple flavour.

STORAGE

Ensure product is stored in a cool, dry and vermin free environment.

RECYCLE ME

NRM bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery Scan QR below for more information.

DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL

Looking for the optimum diet for your horse?

Together with KER we've made it easy with the free online nutrition tool:

MICROSTEED.COM/NRM

Kentucky Equine Research (KER) is the most highly regarded, independent equine research centre in the world, committed to the advancement of equine health and athletic performance through nutrition. As a brand alliance partner, KER collaborates with NRM to provide nutritional solutions with unique, scientifically balanced feeds, specific to New Zealand, with the science to support them.
