

Dairy Protein Plus

High protein, high energy compound feed for lactating dairy cows

A compounded pellet feed specifically formulated to be cost-effective whilst delivering high levels of protein. Ideal when pasture and forage protein levels are limiting production or higher levels of production are required.

KEY BENEFITS AND FEATURES

NRM Dairy Protein Plus contains:

- Elevated protein levels by the inclusion of oilseed products (e.g. soya bean meal) and legumes such as beans and peas.
- Starch from grains and grain by-products in addition to sugar from molasses, which are readily fermentable and can help stimulate milk protein production.
- A maximum 15% palm kernel expeller meal, providing protein and energy from saturated fat, which can help maintain body condition.
- Added calcium, magnesium and sodium to help meet the needs of lactating animals in addition to vitamins A, D₃ and E.
- Added cobalt, copper, iodine, manganese, selenium and zinc which in many cases eliminates the need for additional trace mineral supplementation when fed at 3-4kg/head/day.

INGREDIENTS SELECTED FROM

Grain and grain by-products, oilseed meals, beans, peas, grass fibre, vegetable oils and fats, molasses, flavour, limestone, magnesium oxide, salt, vitamins and trace elements. May contain or be sourced from genetically modified source crops.

NRM Dairy Protein Plus contains a maximum of 15% PKE. NRM Dairy Protein Plus does not contain any restricted animal material.

Contains 3.3mg/kg added cobalt, 75mg/kg added copper, 5mg/kg added iodine, 50mg/kg added manganese, **2.5mg/kg added selenium**, 250mg/kg added zinc plus Vitamins A, D₃ and E, 8.5g/kg calcium, 5g/kg magnesium, 3.8g/kg sodium. Do not use at the same time as other selenised fertiliser, prill or product and do not exceed the stated dose or frequency without consulting a nutritionist or veterinarian.

To discuss the optimum feeding levels and diet for your herd, please call your local NRM Nutrition Specialist.

TYPICAL ANALYSIS[^] (APPROXIMATE ON A DM BASIS)

Metabolisable Energy*	12.5 (MJ ME/kg)
Crude Protein	25%
Starch & Sugar	30% (min)
NDF	20% (max)

*Metabolisable Energy (ME) values are calculated by a registered laboratory from an equation and are not an actual measurement. Therefore they are only a guide for predicting the energy content of a feed.

[^]Variations in nutritional values may occur due to natural variability in feed ingredients. Our FeedSafe NZ certified sites have well developed systems to minimise any variation from the typical levels shown.

FEEDING RECOMMENDATIONS

Typical feeding rates are 1-4kg/head/day. If wishing to feed over 4kg/head/day for an extended period a tailored version with lower levels of trace minerals could be manufactured.

If cows are not currently fed grain or pellets, introduce NRM Dairy Protein Plus at 0.5-1kg per milking (1-2kg/day) and gradually increase by 0.15kg/day until the desired intake has been achieved. Always provide access to long forage and clean drinking water. The mineral requirements of herds varies greatly, regular testing of blood and liver samples may be helpful to ensure target health, immunity and fertility levels are achieved.

Suitable for feeding to lactating cattle.

ADDITIVES AVAILABLE

NRM Dairy Protein Plus is made to order and can be tailored at additional cost to meet individual farm requirements by the addition of:

- Additional Standard or Premium Pre-mix to accommodate low feeding rates
- Bovatec[®] 20CC as an aid in increased production of milk solids**
- Bioplex High Five
- Dicalcium phosphate
- Limestone flour
- Magnesium oxide
- Registered mycotoxin binder
- Registered zinc as an aid in the prevention of facial eczema
- Rumen bypass fat
- Zinc methionine for improved foot health and reduction in somatic cell counts

The addition of additives may marginally lower the actual specifications of the pellets as supplied.

Subject to regional and seasonal availability.

**Bovatec[®] 20CC is registered pursuant to the ACVM Act 1997, Registration Number A009679 See www.foodsafety.govt.nz for registration conditions.

NOTICE – CONTAINS ADDED MAGNESIUM OXIDE

The feeding of this product to dairy cows may increase their risk of clinical salmonellosis. It is recommended that veterinary advice is obtained to ascertain potential risks associated with the use of this product in your environment before product is used.

STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight.

MARKETED AND DISTRIBUTED BY NRM

We guarantee the quality of our products.
