

# Duck Tucker

## For Pond Feeding

### Simple blend for feeding duck ponds

Duck Tucker is a mixture of quality grains designed for feeding and attracting ducks at ponds. It is not a complete duck feed but is fed to appetite according to individual pond situation needs.

### KEY BENEFITS AND FEATURES

- Natural New Zealand quality grains and/or legumes which ducks enjoy eating.
- Regular and repeated feeding helps to attract and retain more birds to a location.
- Can be readily used with a feeder or without.

### FEEDING RECOMMENDATIONS

To feel secure, wild ducks prefer quiet areas away from human activities, and with plenty of good shrubby tree cover at the edge of ponds so they can easily find shelter underneath.

Timing is of the essence to attract wild ducks to a pond area. It is best to start feeding both on the surrounding land and in the shallow water at the edge of the pond for about two months, from the beginning of March through until the first week of May.

As ducks typically feed in the evening or fading light, it is best to feed the pond from early afternoon. If required, a feeder can be set up to allow for less disruption to the birds when replenishing their feed supplies.

If used with farmyard ducks, ensure that fresh, clean drinking water is always available.

### DECLARATION

NRM declares that this stock feed is suitable for feeding to ducks. This stock feed has not been grown on land human effluent has been applied to and all withholding periods have been observed

### INGREDIENTS SELECTED FROM

Barley, wheat, maize, peas. Due to regional differences in the supply and availability of grains and legumes the product composition will vary by island.

Formulated from non-genetically modified crops and by-products, may contain traces of GM materials used in the feed mill.

HIGH ENERGY

NZ MADE

ALL NATURAL

### STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight.

### DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL

Not for human consumption.

Care is recommended around waterways which can be dangerous places, especially during the hunting season.

### RECYCLE ME

NRM bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. NRM bags are made from woven polypropylene.
