

# Steam Flaked Barley

## New Zealand Grown Barley

A readily digestible source of energy

A high energy grain which has been steam flaked to improve utilisation following consumption by livestock. Steam flaking creates less fines than dry rolling which improves the appeal to livestock.

### KEY BENEFITS AND FEATURES

NRM Steam Flaked Barley contains:

- All the nutritional benefits of NZ grown barley in a processed form which ensures good digestibility across all farmed species.
- Less fines than dry rolled grains which can improve acceptability to animals.
- Grains which have been heat treated prior to rolling which can improve keep quality by killing some spoilage organisms on the seed coat that survive dry processing.

### FEEDING RECOMMENDATIONS

NRM Steam Flaked Barley is not a complete feed and should only be offered as a supplement to other feeds as part of a complete diet suitable for the type of animal being fed.

For pigs and poultry ensure adequate protein is available as part of the diet.

For horses and ruminants (cattle, sheep, deer and camelids) ensure adequate pasture, silage or hay is always available. Processed feed barley is readily fermentable - rumen buffers should be considered if feeding to ruminants at high rates.

Barley is a high energy feed rich in starch.

Always introduce new feeds gradually over 7-14 days.

Ensure clean fresh drinking water is always available.

NZ MADE

STEAM FLAKED

### TYPICAL ANALYSIS<sup>^</sup>

Dry Matter%	85
Crude Protein% (as fed basis)	10
Digestible Energy* MJ/kg DM	12.8
Metabolisable Energy** MJ ME/kg DM	13.0

\*\*Metabolisable Energy (ME) value is calculated by a registered laboratory from an equation and is not an actual measurement and is intended only as a guide to predict the energy content of the feed.

\*For horses: the Digestible Energy (DE) value is calculated using an equation and is not an actual measured value and is only a guide for predicting the energy content of the feed.

<sup>^</sup>Variations in nutritional values may occur due to natural variability in feed ingredients.

## FEEDING RATES (KG/HEAD/DAY)

Animal Species	Animal Type	Feeding Rate (kg/head/day)
Cattle	Dairy cows	Up to 6kg
	Beef animals and dry cows	Up to 2kg
	Calves	Up to 1kg
Sheep	Ewes	Up to 200g
	Lambs	Up to 100g
Goats	Does	Up to 300g
	Kids	Up to 150g
Horses		Up to 2kg
Camelids	Adult	Up to 300g
Deer	Adult	Up to 1kg
Poultry		Up to 50g
Pigs		Up to 500g

## INGREDIENTS

Barley. NZ grown barley is not genetically modified. Product does not contain any Restricted Animal Material.

## STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight. Do not feed product which has become wet and moulded.

## RECYCLE ME

NRM bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. NRM bags are made from woven polypropylene.
